History

Frustrated with \$100's of leftover food at end of pack campouts

Not happy with food quality

Inconsistent menus

No handoff from last years camp. Reinvent the wheel.

Logistics

- **1 month** before.
 - Identify shopping partners
 - Identify who can haul food
 - Copy spreadsheet to new version (keep history)
- **10 days** before, increase price for late signups (can't buy bulk food)
- **7 days** before, first BJ's shopping, non perishable food
- **Tues** before camp, buy BJ's bananas to allow time to ripen
- Start to empty your home fridge
- **1 day** before. Buy cold items (need to keep in your fridge/freezer)
- **Day of** camp, buy ice (or earlier if you can store it). ***Your host org may have a commercial ice maker.***

The Plan

How do we know how much or buy?

The magic spreadsheet

First version Excel

Converted to google sheets

Equipment

Thermometers that live in your coolers

Coolers for food.

Store cold food for *each meal* in it's own cooler. Label it.
